PROFESSIONAL SUMMARY

Results-driven CS undergraduate with experience translating business requirements into technical solutions across two industry internships. Proven ability to communicate with senior stakeholders (CFO, CEO, CTO), manage end-to-end product delivery, and apply analytical thinking to solve complex problems.

EDUCATION

B.Tech in Computer Science & Engineering

Dr. APJ Abdul Kalam Technical University

2023 – 2027

CGPA: 7.52

Relevant Coursework: Data Structures, Algorithms, Database Management, Operating Systems, Web Technology

EXPERIENCE

Full-Stack Developer Intern, *Playto*

Feb 2026 – Present

- Defined and translated business requirements into technical specifications for a complete Invoice Management System, ensuring alignment with stakeholder goals.
- Integrated multiple payment gateways (XPay, Razorpay, PayU), analyzing vendor trade-offs to recommend the optimal solution for business needs.
- Improved system performance by refactoring legacy components; shipped cross-platform mobile features using CapacitorJS across product and engineering teams.

Full-Stack Developer Intern, *Yugality*

Dec 2025 – Jan 2026

- Acted as bridge between business and technology — translated CFO's product vision into actionable technical requirements and implementation strategies.
- Collaborated with CEO and CTO on product roadmap decisions, contributing technical feasibility analysis and evaluating third-party API solutions for executive decisions.

KEY PROJECTS

PeerPrep — Real-Time Collaborative Coding Platform | *React.js, Next.js, Node.js, WebSockets*

- Architected a real-time multi-user coding platform from problem definition to delivery; designed RESTful APIs for session management and access control.

Spendly — AI-Assisted Expense Tracker | *Next.js, Gemini AI, NeonDB, Clerk*

- Built an intelligent expense tool with AI-driven categorization to surface actionable spending insights; integrated Gemini AI for automated transaction classification.

Socially — Full-Stack Social Platform | *Next.js, Prisma, PostgreSQL*

- Designed relational database schemas and built end-to-end features — posts, notifications, and real-time chat — independently managing the full project lifecycle.

SKILLS & COMPETENCIES

Consulting: Stakeholder Communication, Problem Structuring & Analysis, Business Requirement Gathering, Presentation & Reporting, Strategic Planning, Cross-functional Collaboration

Technical: JavaScript, TypeScript, Python, React, Next.js, Node.js, SQL/PostgreSQL, MongoDB, REST APIs, Git

ACHIEVEMENTS & EXTRACURRICULARS

- Team Leader, Smart India Hackathon 2025** — Led team through problem definition, solution design, and final presentation; qualified college internal round.
- Participant, Chandigarh University Hackathon** — Team-based problem-solving and rapid prototyping under time constraints.
- Blockchain Bootcamp** — Studied decentralized systems and smart contracts, broadening understanding of emerging technology ecosystems.
